

National Astronomy Day
Star Party - April 26, 2015
Safeway Plaza
2300 W. Highway 89A
Solar Viewing from 3:00 p.m. to 5:00 p.m.
Night Sky Viewing from 7:00 p.m. to 9:00 p.m.

See the Sun, Moon, Seven Sisters, Jupiter, and more!

The Sirius Lookers Astro Club, Sedona Public Library, and Keep Sedona Beautiful, Dark-Sky Committee are sponsoring the National Astronomy Day this year on April 26th, Sunday. An event that is now global, starting over 30 years ago by Doug Berger of California for promoting science, and dark sky awareness in the public's eye.

The free star party will be at the Safeway Plaza in West Sedona, starting with (SAFE) solar viewing of our closest star, the "Sun". See explosions coming off the Sun with a H-alpha filtered scope and sunspots! The solar viewing will be from 3:00 p.m. to 5:00 p.m.

The night sky viewing will be from 7:00 p.m. to 9:00 p.m. Highlights are the Crescent Moon, the Seven Sisters Star Cluster, Jupiter, and more! Binoculars and giant scopes, (even more powerful than the Lowell Observatory), will be on hand for enhanced viewing.

Bring the whole family for this fun activity under the stars. Everyone is welcome to this free public event. For more information, please go to the website: www.siriuslookers.org
