**KSB believes that the scenic beauty of Sedona should be protected, and that the built environment should never compete for attention with our natural surroundings, day or night.**

Thus, judging for new or redesigned buildings is based on their harmony with the natural environment, beyond what is required by municipal or county regulations. Outdoor lighting, signage and landscaping are judged by the same standards. Single-family homes are not usually considered for these awards, unless there is an exceptional innovation in environmental construction.
